

Cinema Sound Foley Library

Content Layout

Each CSFL patch (Ancillary, Footsteps Female, etc.) contains a variety of Categories, which then contain Banks. A Bank can contain up to 48 samples each. This document lists all patches, Categories, and Banks, NOT each individual sample – there are far too many to write out!

Clothes

In this patch, Categories have the same set of Banks: Short, Medium, and Long, which refer to the *length* of the foley hits/touches. The Category names (Soft, Medium, Loud) refer to *dynamics* or *intensity*.

A handful of Categories have only Short & Medium, where Long sounds don't work. So, rather than list every Bank here (it would take over 15 pages!), we will simply list the Categories – all 100 of them – and put an asterisk next to categories that have fewer than the 3 typical Bank variations.
